Under no circumstances will HDFC Asset Management Company Limited or its bankers or its service providers be liable for any lag / delay in realization of funds and consequent pricing of units.

**Transaction requests received through mailing services:**

Investors are requested to note that in case of application/transaction forms sent through mailing services such as Post, Courier, etc., the time of receipt for determining the applicability of NAV, would be the time when the request for purchase / sale / switch of units is actually time stamped at the Official Point(s) of Acceptance (OPA).

Thus, there may be a time lag between the receipt of such application/transaction forms at OPA and the actual time stamping of the same in accordance with the regulatory requirements. This lag may impact the applicability of NAV for such transactions as per the applicable cut-off timing guidelines. Under no circumstances will HDFC AMC/the Fund or its service providers be liable for the same.

## RISK PROFILE OF THE SCHEME

### Scheme Specific Risk Factors

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document of the Scheme carefully for details on risk factors before investment. Scheme Specific Risk Factors include but are not limited to the following:

#### (i) Risk factors associated with investing in equities and equity related instruments

- Equity shares and equity related instruments are volatile and prone to price fluctuations on a daily basis. Investments in equity shares and equity related instruments involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risks.
- Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges. Investment in such securities may lead to increase in the scheme portfolio risk.
- While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges and may lead to the Scheme incurring losses till the security is finally sold.
- Scheme's performance may differ from the benchmark index to the extent of the investments held in the debt segment, as per the investment pattern indicated under normal circumstances.

#### (ii) Risk factors associated with investing in Fixed Income Securities

- The Net Asset Value (NAV) of the Scheme, to the extent invested in Debt and Money Market instruments, will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- Money market instruments, while fairly liquid, lack a well developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.
- Investments in money market instruments involve credit risk commensurate with short term rating of the issuers.
- Investment in Debt instruments are subject to varying degree of credit risk or default risk (i.e. the risk of an issuer's inability to meet interest and principal payments on its obligations) or any other issues, which may have their credit ratings downgraded. Changes in financial conditions of an issuer, changes in economic and political conditions in general, or changes in economic and/ or political conditions specific to an issuer, all of which are factors that may have an adverse impact on an issuer's credit quality and security values. This may increase the risk of the portfolio. The Investment Manager will endeavour to manage credit risk through in-house credit analysis.
- Government securities where a fixed return is offered run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. The new level of interest rate is determined by the rates at which government raises new money and/or the price levels at which the market is already dealing in existing securities. The price-risk is not unique to Government Securities. It exists for all fixed income securities. However, Government Securities are unique in the sense that their credit risk generally remains zero. Therefore, their prices are influenced only by movement in interest rates in the financial system.
- Different types of fixed income securities in which the Scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the Scheme risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher level of risk than Government securities. Further even among corporate bonds, AAA rated bonds, are comparatively less risky than AA rated bonds.
- The AMC may, considering the overall level of risk of the portfolio, invest in lower rated / unrated securities offering higher yields as well as zero coupon securities that offer attractive yields. This may increase the absolute level of risk of the portfolio.
- As zero coupon securities do not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates and are subject to issuer default risk. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio. Zero coupon or deep discount bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specified date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face values. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the Issuer. The market prices of zero coupon securities are generally more volatile than the market prices of securities that pay interest periodically.
- Scheme's performance may differ from the benchmark index to the extent of the investments held in the equity segment, as per the investment pattern indicated under normal circumstances.
- **Prepayment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the Scheme to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- **Reinvestment Risk:** This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- **Settlement Risk:** Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are uninvested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well developed and liquid secondary market for debt securities, may result at times in potential losses to the Scheme in the event of a subsequent decline in the value of securities held in the Scheme's portfolio.
- The Scheme at times may receive large number of redemption requests, leading to an assetliability mismatch and therefore, requiring the investment manager to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments.

#### (iii) General Risk Factors

- Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Units of the Scheme can go up or down because of various factors that affect the capital markets in general.
- As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme. In view of the above, the Trustee has the right, in its sole discretion, to limit redemptions (including suspending redemptions) under certain circumstances, as described in Scheme Information Document under **"Right to Restrict Redemption and/ or Suspend Redemption of the Units"** in Section **"Restrictions, if any, on the right to freely retain or dispose of units being offered"**.
- At times, due to the forces and factors affecting the capital market, the Scheme may not be able to invest in securities falling within its investment objective resulting in holding the monies collected by it in cash or cash equivalent or invest the same in other permissible securities / investments amounting to substantial reduction in the earning capability of the Plan(s). The Scheme may retain certain investments in cash or cash equivalents for its day-to-day liquidity requirements.
- Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The AMC may choose to invest in unlisted securities that offer attractive returns. This may increase the risk of the portfolio.
- Investment strategy to be adopted by the Scheme may carry the risk of significant variance between the portfolio allocation of the Scheme and the Benchmark particularly over a short to medium term period.
- Performance of the Scheme may be affected by political, social, and economic developments, which may include changes in government policies, diplomatic conditions, and taxation policies.

#### (iv) Risk factors associated with investing in Foreign Securities

Risk factors associated with investing in Foreign Securities are:

##### • **Currency Risk:**

Moving from Indian Rupee (INR) to any other currency entails currency risk. To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee.

##### • **Interest Rate Risk:**

The pace and movement of interest rate cycles of various countries, though loosely co-related, can differ significantly. Hence by investing in securities of countries other than India, the Scheme stand exposed to their interest rate cycles.

- **Credit Risk:**

Investment in Foreign Debt Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer. This is substantially reduced since the SEBI (MF) Regulations stipulate investments only in debt instruments with rating not below investment grade by accredited/registered credit rating agency. To manage risks associated with foreign currency and interest rate exposure, the Mutual Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI/ RBI from time to time.

- **Taxation Risk:**

In addition to the disclosure related to taxation mentioned under section "Special Consideration" in the SID, Investment in Foreign Securities poses additional challenges based on the tax laws of each respective country or jurisdiction. The scheme may be subject to a higher level of taxes than originally anticipated and or dual taxation.

The Scheme may be subject to withholding or other taxes on income and/or gains arising from its investment portfolio. Further, such investments are exposed to risks associated with the changing / evolving tax / regulatory regimes of all the countries where the Scheme invests. All these may entail a higher outgo to the Scheme by way of taxes, transaction costs, fees etc. thus adversely impacting its NAV; resulting in lower returns to an Investor.

- **Legal and Regulatory Risk:**

Legal and regulatory changes could occur during the term of the Scheme which may adversely affect it. If any of the laws and regulations currently in effect should change or any new laws or regulations should be enacted, the legal requirements to which the Scheme and the investors may be subject could differ materially from current requirements and may materially and adversely affect the Scheme and the investors. Legislation/ Regulatory guidelines could also be imposed retrospectively.

- **Country Risk:**

The Country risk arises from the inability of a country, to meet its financial obligations. It is the risk encompassing economic, social and political conditions in a foreign country, which might adversely affect foreign investors' financial interests. In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, bilateral conflict leading to immobilisation of the overseas financial assets and the prevalent tax laws of the respective jurisdiction for execution of trades or otherwise.

To manage risks associated with foreign currency and interest rate exposure, the Mutual Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI/ RBI from time to time.

**(v) Risk factors associated with investing in Derivatives**

- The AMC, on behalf of the Scheme may use various derivative products, from time to time, in an attempt to protect the value of the portfolio and enhance Unit holders' interest. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Other risks include, the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.
- **Credit Risk:** The credit risk in derivative transaction is the risk that the counter party will default on its obligations and is generally low, as there is no exchange of principal amounts in a derivative transaction.
- **Illiquidity risk:** This is the risk that a derivative cannot be sold or purchased quickly enough at a fair price, due to lack of liquidity in the market

**(vi) Risk factors associated with investing in Securitised Debt**

Risk factors associated with investing in Securitised Debt summarized below.

- Limited Liquidity & Price Risk
- Limited Recourse, Delinquency and Credit Risk
- Risks due to possible prepayments and Charge Offs
- Bankruptcy of the Swap Bank
- Risk of Co-mingling

**Please read the Scheme Information Document (SID) of the Scheme for details.**

**(vii) Risk factors associated with Securities Lending**

As with other modes of extensions of credit, there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

**(ix) Risk factors associated with REITs and InvITs:**

- **Price Risk:**  
Securities / Instruments of REITs and InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. The extent of fall or rise in the prices is a fluctuation in general market conditions, factors and forces affecting capital market, Real Estate and Infrastructure sectors, level of interest rates, trading volumes, settlement periods and transfer procedures.
- **Interest Rate Risk:**  
Securities / Instruments of REITs and InvITs run interest rate risk. Generally, when interest rates rise, prices of units fall and when interest rates drop, such prices increase.
- **Credit Risk:**  
Credit risk means that the issuer of a REIT / InvIT security / instrument may default on interest payment or even on paying back the principal amount on maturity. Securities / Instruments of REITs and InvITs are likely to have volatile cash flows as the repayment dates would not necessarily be pre scheduled.
- **Liquidity Risk:**  
This refers to the ease with which securities / instruments of REITs / InvITs can be sold. There is no assurance that an active secondary market will develop or be maintained. Hence there would be time when trading in the units could be infrequent. The subsequent valuation of illiquid units may reflect a discount from the market price of comparable securities / instruments for which a liquid market exists. As these products are new to the market they are likely to be exposed to liquidity risk.
- **Reinvestment Risk:**  
Investments in securities / instruments of REITs and InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.
- **Legal and Regulatory Risk:**  
The regulatory framework governing investments in securities / instruments of REITs and InvITs comprises a relatively new set of regulations and is therefore untested, interpretation and enforcement by regulators and courts involves uncertainties. Presently, it is difficult to forecast as to how any new laws, regulations or standards or future amendments will affect the issuers of REITs / InvITs and the sector as a whole. Furthermore, no assurance can be given that the regulatory system will not change in a way that will impair the ability of the Issuers to comply with the regulations, conduct the business, compete effectively or make distributions.

**IMPORTANT:**

**Before investing, investors should also ascertain about any further changes pertaining to scheme such as features, load structure, etc. made to the Scheme Information Document/ Key Information Memorandum by issue of addenda/ notice after the date of this Document from the AMC/ Mutual Fund/ Investor Service Centres (ISCs)/ Website/ Distributors or Brokers.**

## 12. MODE OF PAYMENT OF REDEMPTION / DIVIDEND PROCEEDS-VIA DIRECT CREDIT/ NEFT / ECS

- **Real Time Gross Settlement (RTGS)/ National Electronic Funds Transfer (NEFT)**  
The AMC provides the facility of 'Real Time Gross Settlement (RTGS)' and 'National Electronic Funds Transfer (NEFT)' offered by Reserve Bank of India (RBI), which aims to provide credit of redemption and dividend payouts (if any) directly into the bank account of the Unit holder maintained with the banks (participating in the RTGS/ NEFT System).

NEFT is an electronic fund transfer mode that operates on a Deferred Net Settlement (DNS) basis which settles transactions in batches. Contrary to this, in RTGS, transactions are processed continuously throughout the RTGS business hours. The minimum amount to be remitted through RTGS is Rs.2 lakhs. There is no upper ceiling for RTGS transactions. No minimum or maximum stipulation has been fixed for NEFT transactions.

Unit holders can check the list of banks participating in the RTGS / NEFT System from the RBI website i.e. [www.rbi.org.in](http://www.rbi.org.in) or contact any of our Investor Service Centres. However, in the event of the name of Unit holder's bank not appearing in the 'List of Banks participating in RTGS/ NEFT updated on RBI website [www.rbi.org.in](http://www.rbi.org.in), from time to time, the instructions of the Unit holder for remittance of redemption/ dividend (if any) proceeds via RTGS / NEFT System will be discontinued by HDFC Mutual Fund / HDFC Asset Management Company Limited without prior notice to the Unit holder and the payouts of redemption / dividend (if any) proceeds shall be effected by sending the Unit holder(s) a cheque / demand draft.

For more details on RTGS / NEFT or for frequently asked questions (FAQs) on RTGS / NEFT, Unit holders are advised to visit the RBI website [www.rbi.org.in](http://www.rbi.org.in) / HDFC Mutual Fund website [www.hdfcfund.com](http://www.hdfcfund.com)

The list of banks is subject to change from time to time.

### • Electronic Clearing Service (ECS)

Investors who have opted for the ECS facility of RBI for dividend payment will receive a direct credit of the due amount in the mandated bank account whenever the payment is made through ECS. A separate advice regarding credit of amount(s) via ECS will be sent to the Unit holder. It should be noted that while the Mutual Fund will make all efforts, there is no commitment that this facility will be made available to all desirous investors.

Applicants in cities not covered under ECS facility will receive dividend payments, if any, by cheques or demand drafts and the same will be mailed to the Unit holders. Please note that the ECS Facility is available only in respect of dividend payments and not in the case of Redemption of Units.

Therefore, in the absence of a specific request from the Unit holder exercising their choice

of the mode of payment offered by the Fund from time to time, the payment of redemption/ dividend proceeds shall be effected via the RTGS / NEFT mechanism only.

Where this payment mode is not feasible / available, the payment of such proceeds will be made by DC / DD as may be feasible.

Unitholders are advised to opt for the NEFT / RTGS, as it helps in avoiding loss of dividend/ redemption warrant in transit or fraudulent encashment. Please update your IFSC and MICR Code in order to get payouts via electronic mode in to your bank account.

The AMC / Fund shall not be held liable for any losses/ claims, etc. arising on account of processing the direct credit or credit via RTGS/ NEFT / ECS of redemption / dividend proceeds on the basis of Bank Account details as provided by the Unit holder in the Application Form.

However, if the Unit holders are not keen on availing of any of the said facilities and prefer receiving cheques / demand drafts, Unit holders may indicate their intention in the Application Form in the space provided specifically. The AMC/Fund would then ensure that the payouts are effected by sending the Unit holders a cheque / demand draft. In case of unforeseen circumstances, the AMC/Fund reserves the right to issue a cheque / demand draft.

Accordingly, individuals (including Joint Holders who are individuals, NRIs but not PIOs, Minors) and Sole proprietary firms who do not possess a PAN ("Eligible Investors") are exempt from submission of PAN for investments upto Rs.50,000 in a rolling 12 month period or in a financial year i.e. April to March. However, Eligible Investors are required to undergo Know Your Customer (KYC) procedure with any of the SEBI registered KYC Registration Authorities (KRA). Eligible Investors must quote PAN Exempt KYC Reference Number (PEKRN) issued by the KRA under the KYC acknowledgement letter in the application form and submit a copy thereof along with the application form. In case the applicant is a minor, PAN/PEKRN details of the Guardian shall be submitted, as applicable. Eligible investors (i.e. the First Holder) must not possess a PAN at the time of submission of application form. Eligible investors must hold only one PEKRN issued by any one of the KRAs.

\* HUFs and other categories are not eligible for such investments.

#### 16. Know Your Customer (KYC) Compliance

##### a. KYC registered under KYC Registration Agency (KRA):

###### Units held in account statement (non-demat) form

It is mandatory for the Investors to quote the KYC Compliance Status of each applicant (guardian in case of minor) in the application and attach proof of KYC Compliance viz. KYC Acknowledgement Letter for all purchases / switches / registrations for Systematic Investment Plan (SIP) / Systematic Transfer Plan (STP) / Flex STP / Flex Index Plan / Dividend Transfer Plan (DTP). Applicants intending to apply for units through a Power of Attorney (PoA) must ensure that the issuer of the PoA and the holder of the PoA must mention their KYC Compliance Status and attach proof of KYC Compliance at the time of investment.

SEBI has introduced a common KYC Application Form for all the SEBI registered intermediaries. New investors are therefore requested to use the common KYC Application Form and carry out the KYC process including In-Person Verification (IPV) with any SEBI registered intermediaries including mutual funds. The KYC Application Forms are also available on our website www.hdfcfund.com. Existing KYC compliant investors of the Fund can continue the practice of providing KYC Acknowledgement Letter/ Printout of KYC Compliance Status downloaded from CDSL Ventures Ltd. (CVL) website (www.cvlindia.com) using the PAN at the time of investment.

Once the investor has done KYC with any SEBI registered intermediary, the investor need not undergo the same process again with the Fund. However, the Fund reserves the right to carry out fresh KYC of the investor in its discretion.

###### Units held in electronic (demat) form

For units held in demat form, the KYC performed by the Depository Participant of the applicants will be considered as KYC verification done by the Trustee / AMC. In the event of non compliance of KYC requirements, the Trustee/AMC reserves the right to freeze the folio of the investor(s) and effect mandatory redemption of unit holdings of the investors at the applicable NAV, subject to payment of exit load, if any.

For further details, please refer Section 'Know Your Customer (KYC) Compliance' under Statement of Additional Information available on our website www.hdfcfund.com

##### b. Central KYC Records Registry (CKYCR):

The Government of India vide their Notification dated November 26, 2015 authorised the Central Registry of Securitisation, Asset Reconstruction and Security Interest of India (CERSAI) to act as and to perform the functions of the Central KYC Records Registry under the said rules, including receiving, storing, safeguarding and retrieving the KYC records under the Prevention of Money-Laundering Act, 2002. SEBI required all the

market intermediaries to update/upload KYC details of the new customer/investors (not KYC-KRA compliant) on CERSAI's online platform. CERSAI is a centralized repository of KYC records of customers/investors in the financial sector with uniform KYC norms and inter-usability of the KYC records across the sector with an objective to reduce the burden of producing KYC documents and getting those verified every time when the customer/investors creates a new relationship with a financial entity. Central KYC (CKYC) will store all the customer/investor information at one central server that is accessible to all the financial institutions. After opening a KYC account under the CKYC, customer/investor will get a 14-digit identification number ("KYC Number") and that same may be quoted by the investor wanting to invest in mutual funds. Further, the Mutual Fund/AMC is required to check whether the PAN of the investor has been updated in CKYCR. In case the PAN has not been updated, the Mutual Fund/AMC shall collect a self certified copy of the investor's PAN card and update/upload the same in CKYCR.

In case the Investor uses the old KRA KYC form for updating of any KYC information, such investor shall be required to provide additional/missing information only by using the supplementary CKYC form or fill the new "CKYC form".
