<b>Investment strategies</b>	The Scheme endeavors to generate returns that are in line with the performance of gold, subject to Tracking Errors. The Scheme is not actively managed and no attempt will be made to buy or sell gold to protect against or to take advantage of fluctuations in the price of gold. The AMC does not make any judgments about the investment merit of gold or particular security nor will it attempt to apply any economic, financial or market analysis. The Scheme shall invest all of its funds in gold, except to meet its liquidity requirements.	
<b>Risk profile of the scheme</b>	Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investing. Scheme specific Risk Factors are summarized below:  The scheme carries risks associated with investing in gold and money market instruments.  Investment in Scheme's units involves investment risks such as market risks, trading volume risk, settlement risk, liquidity risk and default risk. The AMC may choose to invest in unlisted securities which may increase the risk on the portfolio. Also, the value of the Scheme's investments may be affected by currency exchange rates, changes in law/policies of the government, taxation laws and political, economic or other developments.  Investments in money market instruments are subject to interest rate risk, re-investment risk, liquidity risk, credit risk, settlement risk, etc.	
<b>Risk management</b>	The primary risk in investing in gold is the risk to the holding of gold (e.g. through theft or damage). The scheme, through the custodian, will store the gold in secure vaults and insure the same against common risks. For the investments in money market instruments, the AMC has incorporated adequate safeguards to manage risk in the portfolio construction process.
